LEBANON SHOULDER AND SIDEWALK PROJECT TO RESUME
OLD ETNA ROAD AND HEATER ROAD/MT. SUPPORT ROAD

The New Hampshire Department of Transportation announces the planned resumption of work on the construction of shoulders and sidewalks to accommodate bicycles and pedestrians on Old Etna Road and Heater Road/Mt. Support Road in Lebanon.

Work is expected to resume the week of June 26 with work along Old Etna Road. It's anticipated that the remaining work will take approximately four weeks to complete.

One-way alternating traffic on Old Etna Road and Heater Road/Mount Support Road will be necessary to complete the work. Uniformed officers and flaggers will help guide motorists through the work zones. Advance signing will notify motorists of the construction work.

United Construction Corporation of Newport, New Hampshire is the Contractor for the \$1.3 million project.
